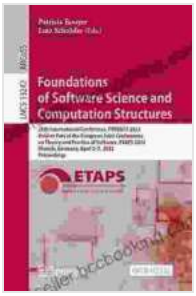
22nd International Conference FOSSACS 2024: A Gateway to the Future of Formal Methods and Software Engineering

The 22nd International Conference on Foundations of Software Science and Computation Structures (FOSSACS 2024) was held as part of the European Joint Conferences on Theory and Practice of Software (ETAPS) in Dublin, Ireland, from March 25-29, 2024.



Foundations of Software Science and Computation Structures: 22nd International Conference, FOSSACS 2024, Held as Part of the European Joint Conferences ... Notes in Computer Science Book 11425) by Dr Rupy Aujla

FOSSACS is a leading international conference that brings together researchers and practitioners from all over the world to discuss the latest advances in formal methods and software engineering. The conference covers a wide range of topics, including:

- Formal semantics of programming languages

- Program verification and analysis
- Software engineering and programming methodology
- Concurrency and distribution
- Security and privacy
- Logic and automata
- Type systems and programming languages

FOSSACS 2024 featured a keynote address by Prof. Peter O'Hearn from the University of Oxford, as well as a number of invited talks by leading researchers in the field. The conference also included a number of workshops and tutorials on a variety of topics.

The FOSSACS 2024 proceedings were published by Springer in the Lecture Notes in Computer Science series. The proceedings contain the full papers of all the accepted submissions, as well as abstracts of the invited talks and tutorials.

FOSSACS 2024 was a great success, with over 300 attendees from all over the world. The conference provided a valuable opportunity for researchers and practitioners to share their latest work and to learn about the latest advances in formal methods and software engineering.
