In his landmark book, *Re-Imagining Capitalism*, Dominic Barton, a former global managing director of McKinsey & Company, argues for a fundamental rethink of our economic system. Barton believes that the current system is unsustainable, both economically and environmentally, and that it is leading to a widening gap between the rich and the poor. He offers a visionary blueprint for a more equitable and sustainable future, one that is based on shared prosperity, environmental stewardship, and social justice.

Barton's book is divided into three parts. The first part, "The Crisis of Capitalism," diagnoses the problems with the current system. Barton argues that the system is too focused on short-term profits and that it has led to a widening gap between the rich and the poor. He also argues that

the system is unsustainable environmentally, as it is based on a finite supply of resources.

The second part of the book, "The Blueprint for a New Capitalism," offers a vision for a more equitable and sustainable future. Barton argues that we need to move to a system that is based on shared prosperity, environmental stewardship, and social justice. He proposes a number of specific policies that could help to create a more just and sustainable economy.

The third part of the book, "The Path to a New Capitalism," outlines the steps that we need to take to transition to a new economic system. Barton argues that we need to build a broad coalition of support for change and that we need to be willing to experiment with new ideas. He also argues that we need to be patient, as it will take time to create a more just and sustainable economy.

Re-Imagining Capitalism is a timely and important book. Barton offers a clear-eyed assessment of the problems with the current economic system and a visionary blueprint for a more equitable and sustainable future. The book is a must-read for anyone who is concerned about the future of our planet and our economy.

About the Author

Dominic Barton is a global business leader and social innovator. He is the former global managing director of McKinsey & Company, one of the world's leading management consulting firms. Barton is also a co-author of the book *The Great Reset*, which argues for a fundamental rethink of the global economic system in the wake of the COVID-19 pandemic.

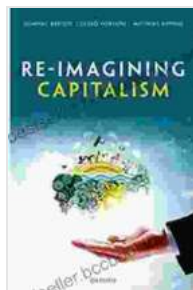

Barton is a passionate advocate for social justice and environmental sustainability. He is a founding member of the Global Business Alliance for Education and a member of the United Nations Sustainable Development Solutions Network. He is also a member of the board of directors of the World Economic Forum and the Brookings Institution.
